MIND AND BODY DISORDER**

The Vicious Cycle of Depression and Chronic Pain

Wednesday, November 9, 2011

12:00 noon – 2:00 pm

583 PARK AVENUE, NEW YORK

(Between East 63rd & East 64th Streets)

SPEAKERS

Deborah Norville is a two-time Emmy® award winning journalist and *New York Times* Best Selling author. Norville is the anchor of the nation's top-rated syndicated newsmagazine, *Inside Edition*. She is the author of several books, most recently *The Power of Respect: Benefit From the Most Forgotten Element of Success*. She is engaged in numerous charitable efforts, including health issues.

Steven P. Roose, M.D. is Professor of Clinical Psychiatry at the College of Physician and Surgeons, Columbia University and Director of the Neuropsychiatry Research Clinic at the NY State Psychiatric Institute. His clinical research focuses on the relationship between cardiovascular disease and depression and on the treatment of late-life depression.

Jerrold F. Rosenbaum, M.D. is Psychiatrist-in-Chief at Massachusetts General Hospital and Stanley Cobb Professor of Psychiatry at Harvard Medical School. He is an authority on mood and anxiety disorders. He has authored over 400 original articles, 20 books, and serves on 12 editorial boards.

Vijay B. Vad, M.D. is a Sports Medicine specialist at the Hospital for Special Surgery and Assistant Professor in Rehabilitation Medicine at Weill Medical College of Cornell University. He is the author of four books including *Stop Pain* and the *Wall Street Journal's* 2005 health book of the year, *Back Rx*.

Joshua A. Gordon, M.D., Ph.D. is a psychiatrist and neuroscientist and is an Assistant Professor in Columbia University's Department of Psychiatry. He is also the Director of Neuroscience Education for Columbia's Psychiatric Residency Training Program. His expertise includes laboratory-based studies with clinical practice and teaching in psychiatry.

The mission of the Hope for Depression Research Foundation (HDRF) is to fund innovative, international research, based on *affective neuroscience* into the origins, diagnosis, treatment and prevention of depression and its related mood and other emotional disorders — bipolar disorder, dysthymia, postpartum depression, post-traumatic stress disorder, anxiety disorders and suicide — with the ultimate goal of finding a cure.

HDRF's charge is two-fold: funding discovery research, while educating the public by heightening awareness that depression is a treatable medical condition.
